Terms and Conditions

We offer usual terms to those of known responsibility. Where purchaser's credit responsibility is unknown to us, cash is required before shipment or reference with time for proper investigation. Orders to be sent C.O.D. should be accompanied with one-fourth cash.

**ALL PRICES IN THIS LIST ARE
NET — NO DISCOUNT. ORDERS
FOR \$10.00 OR LESS — CASH
WITH ORDER PLEASE.**

Any possible claims for rejection or deficiency must be made within ten days after arrival of stock. All shipments travel at the cost and risk of the purchaser except when otherwise agreed.

All prices subject to change without notice. Boxing at cost.

250 at 1000 rate.

If you do not see the items you want, write us. We list only stock that we grow and are not sold out of. We have many items in small quantity that we do not list. Most of our stock is dug in the fall, therefore making it possible to give good service at any time.

We welcome your Want Lists for special quotations.

Special Quotations on Large Quantities

All shipments leave the nursery in good condition. Any injury to boxes and bales in transit should be noted upon the freight bill before acceptance at the depot. Our responsibility ends when shipments are accepted by the carrier.

Kindly advise when ordering, the method of shipment desired; otherwise, we will use our best judgment in shipping the shortest and safest route. We deliver by truck within a reasonable distance.

GUARANTEE

Krieger's Nursery guarantees all of its plants to be true-to-name and in a vigorous growing condition upon arrival. Any plants that prove otherwise, will be replaced without cost or purchase price refunded.

Signed:

A. W. KRIEGER

All prices subject to prior sale and loss.

**HARDY NORTHERN GROWN
NURSERY STOCK**

Packaged Strawberry Plants

Fancy, bright colored label. Full planting instructions on back of each label.

We have developed a new type of Strawberry package for over-the-counter trade.

This package is not a bunch of Strawberry plants wrapped up—the plants are individually laid in moss and rolled up so that the plants will not come in close contact with each other and rot out the center of the bundle.

Under normal conditions plants can be kept on the counter for **two weeks** without any loss. Can be held longer if watered.

Plants shipped in special telescope carton. Just take off the cover and set it on the counter. No heated plants under any conditions. Can be watered from top if necessary. Excess water runs out of bottom vent.

Packages packed with all tops up. Packed 35 to 50 packages per carton, depending on variety. The average weight per package is about 1 ¼ pounds.

SUPERFECTION (*Everbearer*)

The new leader of Everbearing varieties. Introduced by the originator of Gem. Produces fruit freely from mid-July until frost. Reproduces plants abundantly. Best of the Everbearers.

CATSKILL (*Midseason to Late*)

One of the best for production and quality. Berries are a glossy, bright red and very attractive. Plants are large and vigorous. A cross between Premier and Marshall.

STREAMLINER (*Everbearer*)

The outstanding fall crop berry. Bears fruit from July to November the same year planted. The best of the everbearers.

GEM (*Everbearer*)

This variety has become a standard among fall-bearing varieties. Lower in price only because it produces plants freely.

PREMIER (*Early*)

The earliest of all Strawberry varieties. Good for both market and garden. A good variety which has proven its value for over 20 years. The most widely known and sure-crop variety that we grow.

ROBINSON (*5 Days Later Than Premier*)

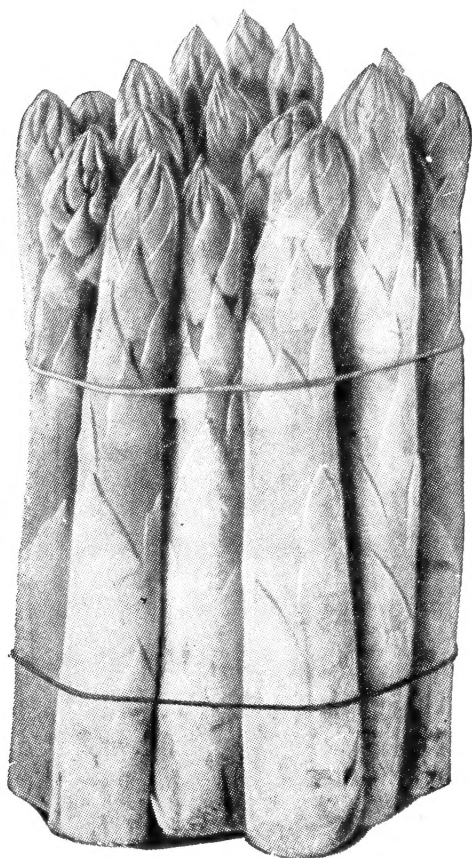

An outstanding variety of Michigan origination. Grown for its large, well shaped berries which have a delicious flavor. A very good variety for canning and freezing if allowed to ripen well on the vine.

DUNLAP (*Midseason*)

The most widely known berry grown. Originated in 1890, this variety has been widely grown for almost 60 years. Disease resistant and a free plant maker.

ARROWHEAD (*Late*)

A new variety from the University of Minnesota Experiment Station. Very vigorous and produces plants very liberally. A good freezing variety. Berries are large and uniform—very firm, which makes them a good garden and commercial variety.

Asparagus Roots

Mary Washington

Paradise

MARY WASHINGTON

Recommended by the U. S. Department of Agriculture for its heavy yields and rust resistance.

PARADISE

This is the new variety which is claimed to be more vigorous and comes into production earlier than other varieties.

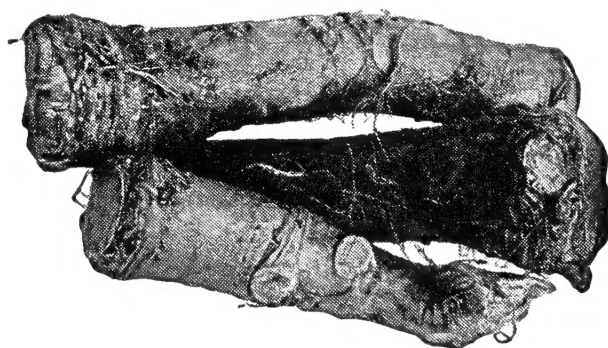

Fresh dug for your order. U. S. Standard Grade, 1-year, 60 lbs. per thousand. 2-year, 120 lbs. per thousand. 3-year jumbo, 250 lbs. per thousand.

Rhubarb Roots

Canada Red and MacDonald

Can only be grown from divisions. Both known as seedless varieties.

Victoria

A seedling variety. Easy to grow, priced low to fit in every garden.

VICTORIA

A seedling variety that is widely grown. Plants vary in color. All Rhubarb will produce red stalks if shaded.

CANADA RED

A vigorous all-red variety. Red all the way through the stalk, way up into the leaf. In pies or sauce it is deep red. Can be mixed with Victoria for a color blend.

MacDONALD

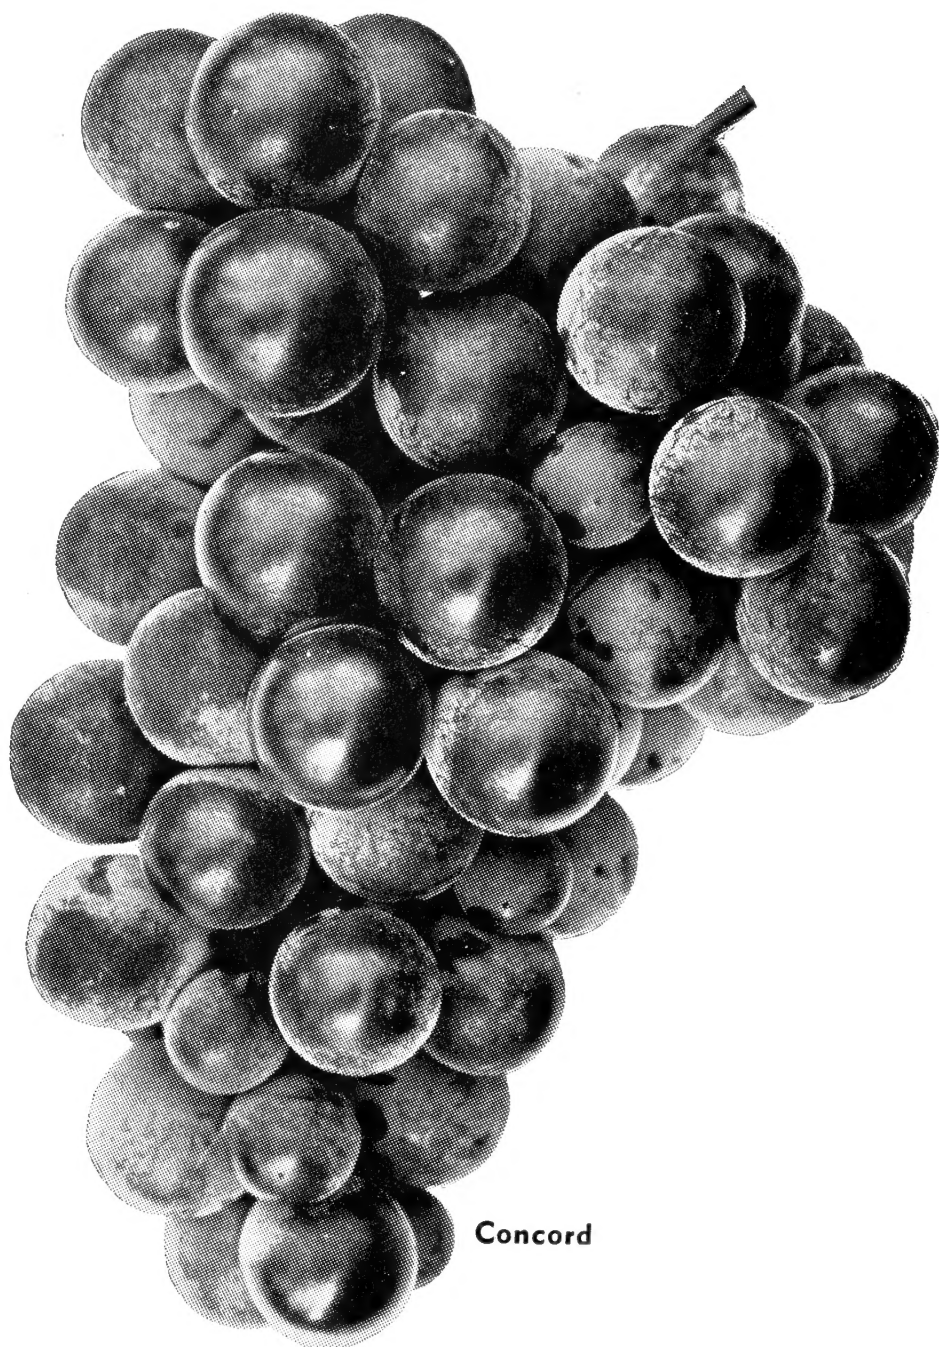

Red only on the outer surface; still plenty of color. Produces a pleasant red sauce. A tender-skinned variety.

Concord

Grape Vines

PORTLAND (*White*)

Berries green to amber in color. Fine, vigorous, hardy and productive. Fruit firm and juicy. Good dessert Grape for home and market. Early to mid-season.

CONCORD (*Blue*)

One of the most popular and reliable Grapes ever grown. Will do well in any type of soil and produce an abundance of fruit in any area where Grapes can be grown. It has never had any winter injury in Michigan as long as it has been grown here. Still one of the best.

FREDONIA (*Early Black*)

The early new bluish black Grape that deserves more attention. Ripens about two weeks earlier than Concord. Very vigorous and bunches very compact. In the Southwestern Michigan Fruit Belt it is being planted extensively as a commercial variety. One of the best early varieties.

NIAGARA (*White*)

Outstanding white Grape and still the best. The only white Grape of any commercial value. Grown extensively for wine, due to heavy yields and high sugar content. Good commercial and home variety. A few days earlier than Concord.

CATAWBA (Red)

The best of the red varieties. Fruit extra large and bunches compact and of good size. This is the only red Grape that over a period of years has proven to be the best red variety for commercial planting. Also very good for the home garden.

DELAWARE (Red)

A small red variety produced in large clusters; exceptionally high dessert value. One of the sweetest Grapes grown.

SENECA (Yellow)

A new yellow colored skinless Grape. Juicy yet firm, and the skin can be eaten with the Grape. Large, compact bunches; ripens early; hardy and vigorous.

GOLDEN MUSCAT (Amber)

A new amber-colored Grape that ripens late and keeps long on the vine or in storage. Fancy muscat flavor.

CACO (Red)

An early ripening red Grape with a sweet flavor; long, compact bunches.

SHERIDAN (Black)

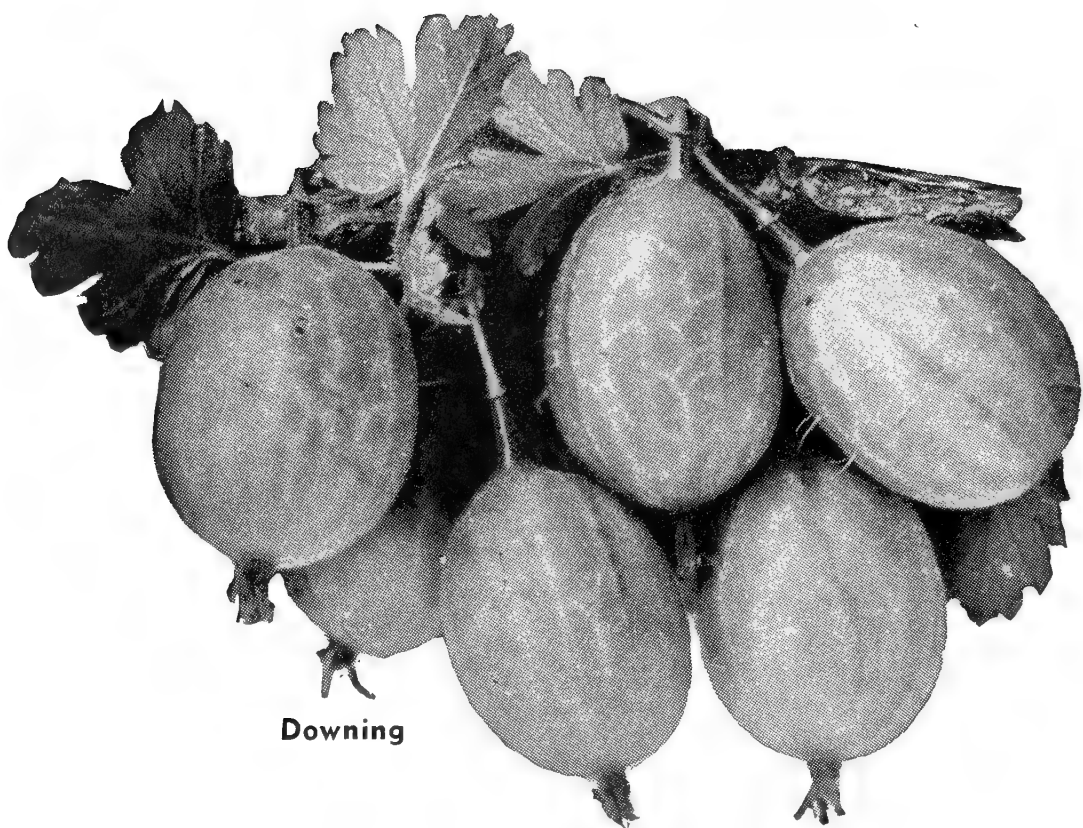

A new late ripening black Grape with a richer and better flavor than Concord. A firm Grape. Excellent shipping quality.

VAN BUREN (Early Blue)

The new early blue variety, highly recommended by the New York Experimental Station as an extremely early variety. Ripens about a week to ten days earlier than the Fredonia or about two to three weeks ahead of the Concord. Very vigorous and productive; sets fruit very readily. Fine, sweet flavor; good commercial as well as garden variety. As hardy as Concord.

Federal Quarantine on Currants and Gooseberries

The movement of Currants and Gooseberries is restricted in some states and localities. If you are located in a state where White Pine is grown and a permit is required, ask your State Department of Agriculture to send us the required permit at the time you mail us your order. In this way your order will not be delayed.

The 1951 growing season was one of the best in many years. We have over 150 acres of choice state certified plant materials to choose from. We grow them by the million! We specialize in Small Fruits.

Wilder

Currants

Currant bushes make a wonderful hedge for the border of the garden. Their use needs encouragement. Currants are always in demand for making jams and jellies due to their high pectin content.

WILDER

One of the most popular commercial varieties in Michigan. Bunches and berries are very large, bright, attractive red. Commercial growers state that the productiveness surpasses all other varieties. Our Currant plants this season are exceptionally heavy.

RED LAKE

The new giant red Currant. The berries being very large, are easy to pick. Very hardy and ripens over a long season. The most outstanding Currant ever grown.

Black Raspberries

CUMBERLAND

The Cumberland still surpasses all Black Raspberries as to an all-around variety. From a commercial standpoint there is none that can replace it at the present time.

LOGAN

This early Black Raspberry ripens a week ahead of the Cumberland. A very productive variety. The Logan is used where the season for Black Raspberries wants to be extended.

MORRISON (Late)

The latest addition to the Black Raspberry family; ripens later than Cumberland. Berries are very large and attractive. Bushes very vigorous and productive.

Purple Raspberries

SODUS

The Sodus variety has almost crowded out all other varieties of Purple Raspberries due to its superiority. It is a cross between the Dundee Black Raspberry and the Newburgh Red Raspberry, and from these varieties it inherits the large size of the berry. The Sodus is a very vigorous grower, and it yields a very heavy crop. This variety should not be left out on your list of small fruits.

RED RASPBERRIES

GOLDEN QUEEN (Yellow)

A beautiful large, golden yellow Raspberry. A very attractive dessert berry and very unusual when used in combination with either Black or Red Raspberries as dessert. The canes are hardy and very vigorous. Culture methods same as Red Raspberries.

NEW WILLAMETTE

A new midseason Raspberry of the Cuthbert type. More vigorous, productive and disease resistant than any variety we have ever grown. Originated in Oregon but does well even where Latham are poor. Berries are large, firm and conical in shape. A very good addition to the Raspberry family.

Indian Summer

Red Raspberries

LATHAM

The standard all-around variety that is still hard to beat.

CHIEF

Just a little earlier than Latham. Very vigorous and a heavy producer.

INDIAN SUMMER

The best of the fall bearing varieties. Also produces a heavy summer crop but its berries are prized most highly in the fall.

ST. REGIS

An old standby that fruits exceptionally heavy in the fall around the Mason and Dixon Line. Used in the northern climate as an early variety. One of the most vigorous, disease resistant varieties which is also grown under the name of Rayner.

SUNRISE (New Early)

A new early variety that is being planted extensively for its early berries.

Rubel

Blueberries

Blueberries' only requirement is an acid soil. Acid Peat mixed with the soil will give it the proper acidity.

RANCOCAS (*Early*)

One of the best early varieties, vigorous, bush upright and productive, medium large, light blue and of good quality. A very heavy producing variety; the size of the berries can be increased by pruning.

RUBEL (*Midseason*)

Ripens about ten days later than Rancocas. Vigorous, upright bush and very productive. Berries are moderately large, light blue, attractive and of good quality. The berries are firm and are, therefore, excellent shippers. Rubel is the oldest named variety and has great commercial value.

JERSEY (*Late*)

Ripens a few days later than the Rubel, although its fruit is extended over a longer ripening period. Bush semi-upright and very vigorous. Fruit very large and firm, making it an excellent garden and shipping variety. Clusters not as compact as Rancocas, making them a good variety to pick.

Lucretia Dewberry

Dewberries

LUCRETIA

A trailing Blackberry of outstanding quality. Under average care it will last a lifetime. Very vigorous and resistant to disease.

Blackberries

ELDORADO

An old standard in upright Blackberries.

ALFRED

Selected for its large, juicy berries. Not as disease-resistant as the Eldorado. Very productive.

EARLY HARVEST

A very productive, early Blackberry. Produces a tremendous crop. If slightly thinned, berries reach a good size. A sure crop variety.

Boysenberries

THORNLESS

Its thornless laterals is its outstanding feature. Berries same quality as regular Boysenberry although not quite as large.

COMMON

The best of the Boysenberry family. Berries large and deep purple in color. Resistant to orange rust.

Ebony King!!

A NEW UPRIGHT BLACKBERRY NO BLANKS OR STERILE PLANTS

The Ebony King is a new Blackberry that has been under test for the past twelve years and has proven to be a very heavy-producing variety. Berries are exceptionally large, of the Eldorado type. They are very sweet and have the wonderful, sweet Blackberry flavor. The berries ripen about a week to ten days earlier than the Eldorado.

Our test block is 100 per cent free of sterility or plants that fail to produce berries. Very thrifty, vigorous-growing bushes that are exceptionally hardy—having withstood the 22-degree below zero temperature last November. The bushes are upright with very strong canes, being able to hold up a heavy crop without breaking down. Potential yield is 8,000 to 10,000 pints per acre.

Give your customers the best in Blackberries—one that we have been looking forward to for many, many years. We have an exceptionally nice block of 1-yr., No. 1 Rooted Cuttings and also 2-yr. Transplants. This is the first season that these Ebony King Blackberries are being offered to the nurseryman, and the supply is still limited.
